

We wanted to provide everyone with an update on where things are at with the reorganization of Citizen's Fire Company #1 of Highspire.

The outpouring of support from our citizens and offers to help this past month have been overwhelming. In the interim, the surrounding fire agencies have been immeasurably supportive. They have been answering emergency calls within the Borough without any delays and have been extremely instrumental with providing guidance and direction for the fire department.

Although we are not responding to calls at this time, it is our intention to go back into service once some issues have been addressed. We are still conducting in-house training and planning future fundraisers to help pay bills and purchase equipment. Responding to and conducting emergency operations safely, in and outside the Borough of Highspire, is of paramount importance.

Currently, the leadership of the department is diligently working on the most serious items which resulted in the company being taken out of service. Fire Chief Robert Condran Jr., along with outside consultation, is addressing each of the issues.

Most importantly, it is the support and trust from the community that drives the membership. Our goal is to rebuild your fire company into an organization that is both professional and competent and one that prides itself for service to the residents, businesses and community of Highspire.

The CFC#1 Team
